

## THE NEW TECH-ROLL ELECTRIC DRUM MOTOR IS HERE!!

### MADE IN THE USA

Tech-Roll is **manufactured in the USA**. No tariff charges or customs brokerage fees/issues.

### ONE STOP SHOP

By adding "Manufacturing" to our process, we can now **manufacture**, sell, and service our motors, then report to you how they are performing!

### INTERCHANGABLE WITH VAN DER GRAAF® MOTORS

Our motors are designed to drop into existing Van de Graaf® applications.

### WARRANTY

Tech-Roll motors have a, "**It Breaks, We Fix**", warranty. Including warranting against water intrusion.

Contact Conveyor Technology for more information on this revolutionary design and the belt series options available.

# OUR HISTORY

Conveyor Technology was founded by Justin Carmody in 1994, driven by a God-inspired vision. Over the past three decades, we have established ourselves as the drum motor experts in the conveyance industry—becoming North America's largest drum motor dealer and rebuild center. Our success is built on creating measurable increases in run-time for our customers by engineering, selling, servicing, and reporting results back to them. That's why we say, "We Sell Runtime."

Recognizing the need for a U.S.-based supply chain, we have leveraged our extensive drum motor knowledge and application expertise to build a state-of-the-art manufacturing facility—where we will produce the highest quality drum motors in the world. This completes the circle, allowing us to provide a fully integrated customer experience. We are now a one-stop shop for all drum motor needs—right here in the USA.

Our mission is to offer electric and hydraulic drum motors that significantly outlast traditional motors and gearboxes. We focus on creating a safer work environment, eliminating foreign materials from the product stream, and delivering maximum return on investment.
